www.linkedin.com/in/rushela-ekanayaka-357072345

Software Engineering undergraduate with hands-on industry experience developing production-ready web applications, AI-powered platforms, and scalable full-stack solutions. Experienced in designing secure authentication systems, building RESTful APIs, developing responsive user interfaces, and deploying cloud-based applications using modern technologies including React, Next.js, TypeScript, Node.js, ASP.NET Core, Docker, and Kubernetes. Proven ability to collaborate in Agile development environments, solve complex technical challenges, and deliver high quality software solutions for both client projects and enterprise platforms. Passionate about building scalable, user-focused applications while continuously expanding expertise in modern software engineering practices.

- Full-Stack Development
- Software Architecture
- REST API Development
- Authentication & Security
- React & Next.js
- TypeScript Development
- Cloud Deployment
- Database Management
- Microservices
- Docker & Kubernetes
- CI/CD Pipelines
- Agile & Scrum

EDUCATION | CERTIFICATIONS

Sri Lanka Institute of Information Technology (SLIIT) 2023 – 2027
BSc (Hons) in Information Technology, Specializing in Software Engineering

AI Engineer (Gen AI) Course - STEM Link Present

Preparing for the LLB Entrance Examination Present

PROFESSIONAL EXPERIENCE

PROSPER GLOBAL EDUCATION (PVT) LTD | **Software Engineering Internship** AUG 2025 – JAN 2026

- Contributed to uplift.lk, an AI powered higher education platform.
- Implemented secure authentication workflows including account verification and password recovery.
- Developed scalable UI components using TypeScript and Next.js.
- Integrated REST APIs for users, institutions, and course management.
- Debugged and resolved production issues, improving system reliability.
- Collaborated in Agile teams using Git workflows.
- Worked with Turborepo, Cloudflare, and CI/CD deployments.

FELIZEY (EVENT DISCOVERY PLATFORM) | **Freelance (France Client)** FEB 2026 – APR 2026
React, TypeScript, Supabase, Stripe <https://www.felizy.com/>

- Developed a production ready full stack event discovery platform for an international client, supporting global event listings and user engagement.
- Integrated secure Stripe payment processing to enable seamless online transactions and premium event bookings.
- Built responsive, reusable React components and implemented real-time data synchronization using Supabase.
- Optimized application performance, ensuring a fast, scalable, and mobile friendly user experience.
- Collaborated with the client to translate business requirements into reliable, user focused software solutions.

HOLIDAY WORLD TRAVEL PLATFORM | **Freelance (Sri Lanka)** 2025
React, TypeScript, Vite, Tailwind CSS <https://hwtravelsrilanka.com/>

- Developed a full-stack travel booking platform that streamlines tour discovery, booking management, and itinerary planning.
- Designed responsive user interfaces to improve accessibility across desktop and mobile devices.

- Implemented dynamic booking workflows and interactive travel itinerary management features.
- Enhanced application maintainability by developing reusable UI components and scalable frontend architecture.
- Worked closely with project requirements to deliver a modern, high performance tourism platform.

Kalubowila Acupuncture Clinic Website | **Freelance (Sri Lanka)**

(Ongoing)

Next.js , TypeScript , Tailwind CSS , SEO

<https://kalubowila-acupuncture-clinic.vercel.app/>

- Leading the complete redesign and modernization of a legacy healthcare website using Next.js and TypeScript.
- Developing a responsive, mobile-first user experience with reusable components and scalable application architecture.
- Implementing technical SEO, accessibility standards, and performance optimization to improve search visibility and user engagement.
- Optimizing website speed, Core Web Vitals, and content structure to enhance patient experience and online discoverability.
- Applying modern web development best practices to deliver a secure, maintainable, and high-performing healthcare platform.

■

ACADEMIC EXPERIENCE

SMARTHEALTH – AI TELEMEDICINE PLATFORM (MICROSERVICES)

Next.js , .NET 8 , PostgreSQL , RabbitMQ , Redis , Docker ,Kubernetes

<https://github.com/SolarCharge-Finder/smart-healthcare>

- Designed a microservices based healthcare system.
- Implemented transaction safe booking using database locking
- Built event driven communication using RabbitMQ
- Containerized services with Docker and deployed via Kubernetes
- Integrated Redis caching and centralized logging

SOLARCHARGE FINDER – RENEWABLE ENERGY PLATFORM

React , Node.js , MongoDB , Docker , GitHub Actions

<https://github.com/SolarCharge-Finder/SolarCharge-Finder>

- Developed location based solar station discovery system
- Built REST APIs and user review system
- Implemented JWT & OAuth authentication
- Created CI/CD pipelines and automated testing

■

TECHNICAL SKILLS

Programming Languages - C, C++, Java, JavaScript, PHP, SQL, TypeScript, Python

Technologies & Frameworks - Next.js, React, Golang, React Native, Node.js, ASP.NET core, OOP, MERN stack, RESTful APIs

Tools & DevOps - Git, GitHub, Figma, Android Studio, Docker, Kubernetes, GitHub Actions, Cloudflare, Vercel, IntelliJ IDEA, VS code, MS Teams, JIRA, Trello

Practices - Agile/Scrum, code review, unit testing, version control, microservices architecture, JWT/OAuth authentication

■

SOFT SKILLS

Adaptability, Problem Solving, Teamwork, Effective Communication, Leadership, Time Management

■

LANGUAGES

English, Sinhala
